Participant Comments

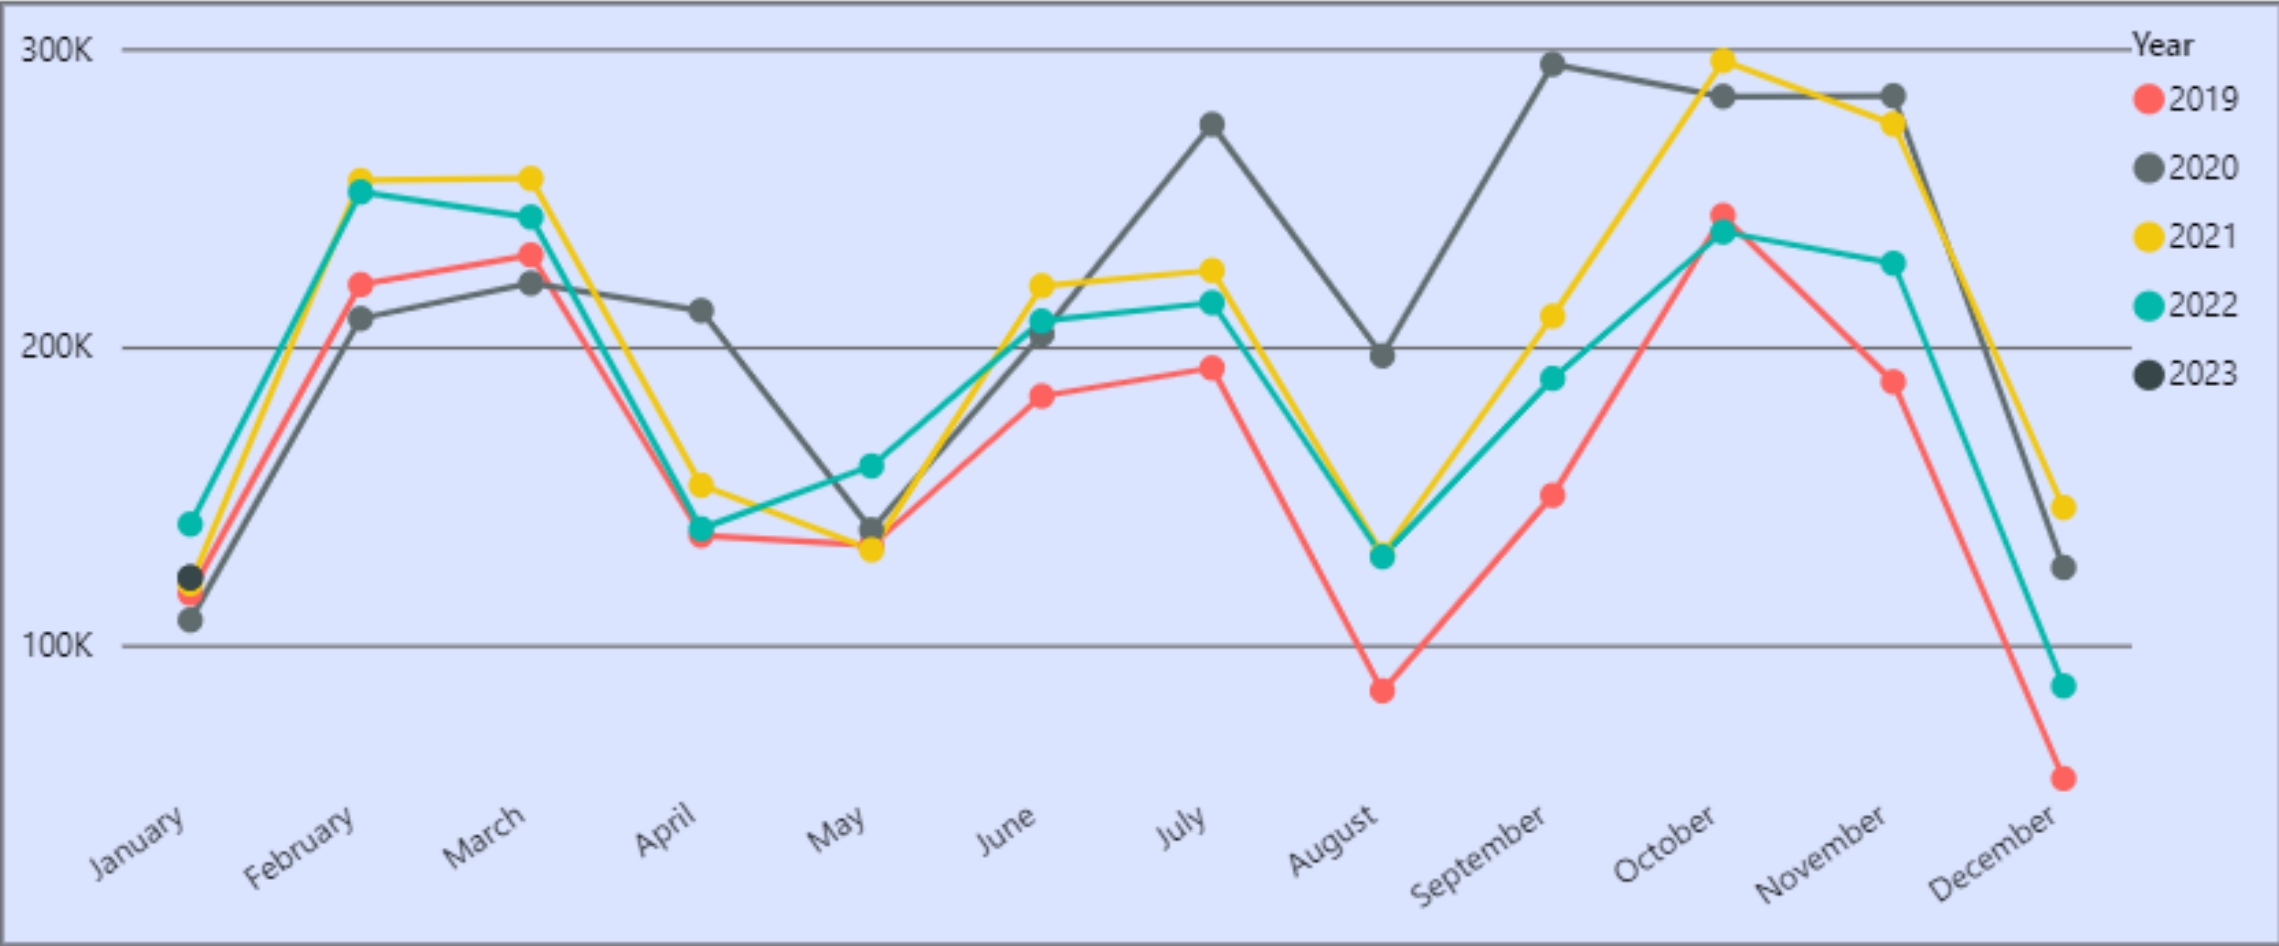

- More training means more understanding. We need more of such to be best if not better.
- The training was good, but can we have a more purposeful training we had so much information to process for that one training.
- It was nice that we got to go step by step at a fair speed. Thank you!
- Arrange for another training.
- I wont mind more of these trainings for me to acquaint myself well about this accessibility.
- I can now go about publishing, thank you the information was very educative.
- Have been more empowered by the today's section, very educative, this will help me when working on my master's projects.
